

WEBB-STILES AIR CARGO CONVEYORS AND SYSTEMS

Typical Air Cargo Storage System

Typical Air Cargo Roller Deck

Webb-Stiles Air Cargo Conveyors are built to handle all types of air cargo containers. Our standard line of roller conveyors feature 5" x 1/4" wall diameter rollers that are chain driven. All our air cargo conveyors meet military specifications. Webb-Stiles conveyors can also be supplied to interface with all types of K loaders, lift trucks and transfer vehicles.

In addition to their line of powered roller conveyors Webb-Stiles has a complete line of auxiliary equipment for our systems. Stops, Transfers, Lifts, Elevating Transfer Vehicles, Ball and Caster Decks, Controls and Control Systems and Complete Turnkey Installation Capabilities.

Webb-Stiles air cargo conveyors are of a proven design and heavy-duty construction. They feature Chain Driven Live Roller Conveyor for positive load movement. All conveyors come fully assembled as possible for ease of installation. All controls devices and control panels are fully wired as possible allowing for ease in field wiring of the units.

Webb-Stiles air cargo conveyor equipment is standard built and can be easily modified for specific locations allowing for special layouts. All conveyors can be supplied with heavy-duty supports to meet the installation requirements; walkways and other additional features are also available.

Webb-Stiles Air Cargo Conveyors are in use by many air cargo customers, including the U. S. Air Force and Naval Defense Departments.
